

FOR IMMEDIATE RELEASE:
NEW—1967-1972 GM A-BODY
Eibach **PRO-KIT** Performance Springs

Eibach's **PRO-KIT** is the perfect solution when it comes to upgrading a classic muscle car's suspension with modern day technology. It's our legendary spring system that will dramatically improve these classics' performance and appearance.

PRO-KIT improves your A-Body's suspension by using our custom engineered performance springs to lower your car's center of gravity, reduce squat during acceleration, body roll while cornering and excessive nose-dive under braking—additionally, you'll reduce excessive fender-well clearance for a more aggressive look. **PRO-KIT** makes a huge difference in handling and will make the car feel better than new.

Every Eibach **PRO-KIT** is designed and tested by our suspension engineers and driving professionals, to deliver high performance handling without ever compromising safety or ride quality. By using our proprietary, progressive spring design, **PRO-KIT** provides the ultimate balance to take your passion for driving to a whole new level.
