

2015-17 FORD F-150 4WD PERFORMANCE SHOCKS

Take your truck performance to the next level! Engineered using the same industry-leading shock technology found in SCORE, CORR, Dakar and WRC racing, the Eibach **PRO-TRUCK** shocks deliver maximum performance on or off-road.

Eibach **PRO-TRUCK Sport shocks** are built to tackle any road. For vehicles with factory front coilover configurations, we offer **PRO-TRUCK Sport Leveling (RHA)**, with front ride height adjustability up to 2.5" (depending on application), allowing you to go with a bigger wheel and tire combo and clear most obstacles on the trail. Unlike "spacer" type lifts, the Eibach **PRO-TRUCK Sport Leveling Shocks** are designed to maximize all available wheel travel for a smoother ride when the going gets tough!

Until you have driven a Truck or SUV equipped with Eibach **PRO-TRUCK** shocks, you will not believe the transformation in handling and performance—all without sacrificing ride quality. All **PRO-TRUCK** Shocks are made by Eibach and dyno tested for quality and performance. Stock or slightly lifted, we have the right performance shocks for your truck or SUV.

PRO-TRUCK

Perfect performance upgrade for your stock truck or SUV with original equipment shocks and standard ride height.

- Monotube Design, 46mm Pistons, Nitrocarburized rods Heavy Duty Powder Coating
- Improved Handling & Stability—On or Off-Road
